Summary

As an experienced Front end engineer who loves to craft exceptional user experiences, I bring over 5 years of expertise in translating design concepts into responsive, high-performance web applications. With a deep understanding of React/Next.js, [Vue.js/Nuxt.js](#), JavaScript/Typescript, and modern front-end technologies, I have successfully delivered innovative solutions that enhance usability and drive engagement.

Work Experience

– OCT 2021 – Present | Front end Engineer, Leatherback | Greater London, England, WC2N 5BW

- Significantly contributed to revenue growth, scaling from \$10,000 to over \$6 million in monthly transactions.
- Transformed more than 50 design prototypes into fully functional web interfaces using HTML, CSS, and JavaScript, leading to substantially improved user experiences.
- Converted a total of 200+ email templates from raw markup to visually appealing, responsive designs, elevating email communication.
- Seamlessly translated 100% of UI/UX designs into intuitive web interfaces, consistently meeting or surpassing all assigned deadlines.
- Played an integral role in developing and delivering over 30 critical business features and modules, pivotal to the successful completion of key projects.
- Instrumental in the launch of a new product targeting the competitive digital payments market in Nigeria, projected to reach a market volume of \$27.89 billion by 2027.
- Designed and executed a strategic pricing strategy that yielded a 50% increase in profitability for the new product line.

– SEP 2019 – OCT 2021 | Front end Engineer, United Bank For Africa | Marina, Lagos, Nigeria

- Revamped the bank's onboarding process, creating a user-friendly interface that will benefit the next 10 million users and ensuring accessibility across multiple devices.
- Created a monitoring dashboard for tracking a significant portion (at least 30%) of forex inflows through Ria Money transfers.
- I led and managed the development and design of five major projects, implementing a modern front-end infrastructure using Vue.js, a JavaScript-centric app framework.
- I provided mentorship and guidance to a team of 10 co-developers as they transitioned to front-end technologies, resulting in a 30% improvement in skill proficiency and enhanced collaboration within the team.

– APR 2018 – MAY 2019 | Front end Engineer, Schoolable | V.I, Lagos, Nigeria

- Successfully launched a flagship finance tool for schools and parents, resulting in a notable 35% increase in the customer base.
- Developed a new user-facing feature that improved usability by 60% and allows users to track their data in real time
- Translated 100% of UI/UX interfaces into functional mock-ups for seamless application development.
- Designed and implemented visual elements for 20+ applications, ensuring each featured an attractive and user-friendly interface.
- Comenced and maintained 10+ reusable code libraries, resulting in a 20% reduction in development time for subsequent projects.
- Played a key role in the redesign of the company's website, aligning it with modern specifications and resulting in a 40% increase in user engagement.
- Collaborated closely with the UI/UX designer to create a scalable framework for 15 user apps, adapting to the company's evolving needs and facilitating a 25% reduction in development cycles.
- Evolved and implemented a comprehensive component library with a focus on accessibility and fluency, increasing overall application quality by 30% and reducing the occurrence of bugs and issues.

Education

2017 – BSc. Computer Science Lagos State University Lagos, Nigeria

Relevant Skills

- React, Next.js, Redux Toolkit, IndexedDB,
- Vue.js, Nuxt.js, Vue.js core concepts, components, directives, Vue Router, Vuex and Pinia. IndexedDB,
- JavaScript and Typescript, including ES6+ features, async/await, and Promises.
- HTML5, CSS, CSS Libraries & Frameworks, Tailwindcss and Bootstrap
- Component-Based Architecture
- RESTful API Integration and Axios
- Build Tools: tools such as Webpack, Vite, Babel, CRA and Vue CLI for setting up and optimizing
- Responsive design and mobile-friendly user interfaces
- Testing (e.g., Jest, Vue Test Utils, Cypress)
- Debugging and using browser developer tools effectively
- Performance optimization of applications, lazy loading, code splitting, and min bundle size
- Version Control: Git, Azure, TLS
- Security: Understanding of web application security best practices
- Progressive Web Apps (PWAs)
- Coding Standards: Adherence to maintainable coding standards and efficient code
- Documentation: ability to create clear and comprehensive documentation for codebase.
- Strong brainstorming skills to tackle complex frontend challenges effectively.
- Languages: English, Yoruba.

Professional Certifications

2023 – Secure Coding Training Course Ethnos Lagos, Nigeria

2019 – The Complete Guide To Build Restful APIs Udemy Online 2018 Fullstack Development in PHP Swapspace Lagos, Nigeria
